## 1.1 Exercise 1

You need to copy a dataset (`~/Documents/P53_expression_levels.tsv`) to a remote server called `apple.uni.lux` preferably to the directory of `/home/projects1/P53_screening`. What command would you use?

**A** `cp apple.uni.lux:/home/projects1/P53_screening/ ~/Documents/P53_expression_levels.tsv`
**B** `scp apple.uni.lux:/home/projects1/P53_screening/ ~/Documents/P53_expression_levels.tsv`
**C** `scp ~/Documents/P53_expression_levels.tsv apple.uni.lux:/home/projects1/P53_screening/`
**D** `scp apple.uni.lux:~/Documents/P53_expression_levels.tsv /home/projects1/P53_screening/`
